INSIGHT AND SUMMARY

KEY INSIGHT

- Rivers State is the highest producing state, followed by Oyo and Delta
- Yam dominates crop production at 34.47% of total output
- Wet season outperforms dry season — 97.5M tonnes vs 93.6M tonnes
- Grade B accounts for 49.73% of all quality output
- Most states show similar land use patterns, with a few outliers in efficiency

RECOMMENDATION

- Focus agricultural investment on underperforming states.
- Expand irrigation to close the wet/dry season gap.
- Prioritize quality improvement to increase Grade A output.
